

CAMBRIDGE
ENGINEERED SOLUTIONS

WATER SCREEN SYSTEMS

Capabilities & Industries Served

Cambridge provides custom PE certified design and (US) manufacturing of Traveling and Static Water Screen Systems, as well as, Trash Racks, associated water screen system components, and other custom solutions for water intake debris removal.

Traveling or Static Water Screens are also referred to as cooling tower, fish escapement, exclusion, intake, pump, or bar screens.

Ask us about custom solutions for Entrainment and Impingement compliance associated with the EPA Clean Water Act, Regulation Section 316(b).

Our experience covers a wide range of environments and industries:

Environments:

- Protecting pumps and downstream systems
- Heat reduction systems (cooling towers)
- Water used in processing
- Preventing invasive fish eggs from entering hatcheries

Industries:

- Refineries, petrochemical and other manufacturing
- Power plants
- Municipal & Agricultural projects
- Fish Hatcheries

Cambridge has been the global leader of conveying and static mesh systems for over 100 years. Our background in Water Screen Systems goes back 80+ years.
